3721491 - Clarifications and Constraints on Integrating S/4HANA Cloud, Private Edition with Joule

Component: CA-JOULE-PRV (Cross-Application Components > Joule > Provisioning), Version: 2, Released On: 28.09.2026

Symptom

User need clarity on the following queries during Joule onboarding:

- How to order Joule in a RISE S/4HANA Cloud Private Edition environment?
- From which version of SAP S/4HANA Cloud, private edition Joule is supported?
- Whether SAP S/4HANA on-premise systems can be enabled for Joule?
- What is the minimum SAPUI5 version required per release for successful Joule features?
- Which type of communication user should be used for backend connectivity during the Joule setup?

Environment

- Joule
- SAP S/4 HANA Cloud, private edition
- SAP BTP, Cloud Foundry runtime and environment

Cause

This KBA is not related to Partner TDD installations.

Resolution

1. How to order Joule in a RISE S/4HANA Cloud Private Edition environment?
    - For new greenfield RISE customers, Joule Entitlements are enabled by default.
    - For existing RISE customers, you need to meet the pre-requisites regarding release versions and you must order this via your SAP Account Executive.
    - Refer to SAP Blog Joule for SAP S/4HANA Cloud Private Edition - A Comprehensive Setup Guide -> "How do I get access to Joule?", for more details.
2. Joule is available for SAP S/4 HANA Cloud Private Edition 2021 onwards but with some exceptions.
    - All capabilities of Joule may not be supported from 2021 but from a higher release.
    - For the list of capabilities available per release of SAP S/4 HANA Cloud Private Edition, refer to Release-Specific Capabilities and SAP Note 3523238 Navigational and Transactional capabilities with Joule in SAP S/4HANA Cloud Private Edition.
3. Joule is available for SAP S/4HANA Cloud Private Edition only within RISE with SAP and in an SAP managed data center setup, but not all on-premise environment.
4. The communication user must be created as a ***"Communication"*** user type.
5. To be able to use the Joule capabilities, the minimum UI5 version required per release of the SAP S/4HANA Cloud Private Edition system must be used, as given in the following table.

SAP S/4HANA Cloud Private Edition Release	**Minimum UI5 Version Required**
2021	1.96.33
2022	1.108.33
2023	1.120.0 or Latest

6. Refer to Constraints for Joule in SAP S/4HANA Cloud Private Edition for more information.
