SAP Note

1648480 - Maintenance for SAP Business Suite 7 Software including SAP NetWeaver

Component: XX-SER-REL-NW (Miscellaneous > Service Messages > Business Suite and SAP S/4HANA Release Information > Release Information for SAP Netweaver and ABAP Platform), Version: 30, Released On: 03.07.2026

Symptom

Information on maintenance of SAP Business Suite 7 required

Other Terms

SAP Business Suite 7, SAP NetWeaver, Java, 7.0x, maintenance, maintenance strategy, mainstream maintenance, maintenance extension, 2027, 2030.

Reason and Prerequisites

This note describes details, restrictions and impacts of the mainstream maintenance extension for SAP Business Suite 7 core applications and corresponding enhancement packages and add-ons through 2027.

Solution

In February 2020, SAP announced an extension of the mainstream maintenance for SAP Business Suite 7 core applications including SAP ERP 6.0, SAP Customer Relationship Management 7.0, SAP Supply Chain Management 7.0, SAP Supplier Relationship Management 7.0 and corresponding enhancement packages (*) and add-ons, as well as SAP Business Suite powered by SAP HANA, from end of December 2025 to end of December 2027. See the SAP Release Brochure (https://support.sap.com/content/dam/support/en_us/library/ssp/release-upgrade-maintenance/maintenance-strategy/sap-release-and-maintenance-strategy-new.pdf) for more details.

In addition, SAP announced to offer extended maintenance until end of December of 2030. See SAP note 2881788 (https://launchpad.support.sap.com/#/notes/2881788) for the offered maintenance phases for Business Suite 7. This gives SAP customers long-term predictability and planning security.

(*) After 2025, SAP will provide mainstream maintenance for the latest three Enhancement Packages only.

This note reflects the current status of planning and may be updated at short notice.

Please be aware that SAP Business Suite is based on individual SAP NetWeaver components such as Application Server ABAP (AS ABAP) and Application Server Java (AS Java).
However, SAP NetWeaver standalone deployments such as SAP Portal, SAP NetWeaver Business Warehouse and SAP Process Orchestration differ
from SAP Business Suite in some aspects from a maintenance perspective.
Although these products are dedicated applications built on top of the ABAP and Java stacks, each product can have its own maintenance strategy.
The differences are covered at the end of this SAP note.
Maintenance details for SAP Business Warehouse are covered in SAP note 2741041 (https://launchpad.support.sap.com/#/notes/2741041).

Restrictions

Please note the following restrictions that apply in the context of the mainstream maintenance extension of SAP Business Suite 7 core applications to 2027:

- Application Server ABAP within SAP NetWeaver 7.00, 7.01, 7.02 will be supported in mainstream maintenance to end of 2025. Extended maintenance will not be offered.
- Application Server ABAP within SAP NetWeaver 7.03, 7.31, 7.40 and 7.50 will be supported in mainstream maintenance to end of 2027. Extended maintenance will be offered until end of 2030.

- Application Server ABAP within SAP NetWeaver 7.10, 7.11, 7.20, 7.30 will be supported in mainstream maintenance to end of 2020. Extended maintenance will not be offered.
- Application Server Java within SAP NetWeaver 7.00, 7.01, 7.02, 7.03 ran out of mainstream maintenance by the end of 2017. Extended maintenance will not be offered.
- Application Server Java within SAP NetWeaver 7.10, 7.11, 7.20, 7.30, 7.31, 7.40 will be supported in mainstream maintenance to end of 2020. Extended maintenance will not be offered.
- Application Server Java within SAP NetWeaver 7.50 will be supported in mainstream maintenance to end of 2027. Extended maintenance will be offered until end of 2030.

SAP NetWeaver		ABAP stack supported to end of…	ABAP Stack extended maintenance until end of ..	Java stack supported to end of…	Java Stack extended maintenance until end of ..
Release	Short reference				
SAP NetWeaver 7.0	7.00	2025	n.a.	2017	n.a.
SAP NetWeaver 7.0 EHP1	7.01	2025	n.a.	2017	n.a.
SAP NetWeaver 7.0 EHP2	7.02	2025	n.a.	2017	n.a.
SAP NetWeaver 7.0 EHP3*	7.03	2027	2030	2017	n.a.
SAP NetWeaver 7.1	7.10	2020	n.a.	2020	n.a.
SAP NetWeaver 7.1 EHP1	7.11	2020	n.a.	2020	n.a.

SAP NetWeaver 7.4	7.40	2027	2030	2020	n.a.
SAP NetWeaver 7.5	7.50	2027	2030	2027	2030

* SAP NetWeaver 7.03 (SAP NetWeaver 7.0 EHP3) contains the 7.31 ABAP stack, i.e. the same ABAP stack as SAP NetWeaver 7.3 EHP1, and the 7.02 Java stack, i.e. the same Java stack as SAP NetWeaver 7.0 EHP2.

The Java stack in SAP NetWeaver 7.00, 7.01, 7.02, 7.03 is based on Java version 1.4.2. This Java version has reached its end of life and was 15 years old by 2017. SAP has invested significantly to ensure SAP customers could get support for this version until 2017. However, these versions are now out of mainstream maintenance.

The Java stack in SAP NetWeaver 7.10, 7.11 is based on Java version 5 (released in 2004); the Java stack in SAP NetWeaver 7.20, 7.30, 7.31, 7.40 uses Java version 6 (released in 2006). As these Java versions will be very old by 2020, the corresponding Java stacks will not be supported beyond 2020. Customers should upgrade to SAP NetWeaver 7.5 based on Java version 8.

The Java stack in SAP NetWeaver 7.50 is based on Java version 8. SAP NetWeaver 7.5 Java will be supported in mainstream maintenance until end of 2027. Extended maintenance will be offered until end of 2030.

Java-based applications are dependent on third-party components. To fulfill SAP’s long-term support commitments, these third-party components have to be supported as well; however the support cycles offered by the third-party vendors differ from the support timeframes offered by SAP. SAP has to take these different support cycles into account and therefore is not free to extend support for Java-based applications by the same timelines as for ABAP-based applications.

Customers with Java-based SAP NetWeaver 7.0x dual stack systems should plan to split the dual stack before upgrading.

With SAP NetWeaver 7.5 dual stack deployments are not supported any longer. Since dual stack deployments are based on both the ABAP stack and the Java stack
the end of maintenace of dual stack deployments is identical to the Java stack. Customers on older releases should plan for a dual stack split.
More detailed information can be found in
https://help.sap.com/doc/a094d14213b8483d8898605e0c4dc120/1.0%20SP18%20NW7xx%20CORR1/en-US/DSS_7XX_ux.pdf
Please refer also to note 1816819 (Dual Stack Support for Business Suite systems) and 1655335 (Details of dual stack splitting).

Impact

Please note that the following are general guidelines. Exceptions may apply for individual releases. For information on maintenance for specific releases please refer to the Product Availability Matrix at http://support.sap.com/pam.

In general the maintenance extension only affects the SAP Business Suite 7 core applications and their enhancement packages, SAP NetWeaver, and other releases whose maintenance was aligned with the SAP Business Suite maintenance (that is, releases which had planned mainstream maintenance to December 2025 in line with the SAP Business Suite 7 core applications). The maintenance for older releases, and releases which were not aligned with the SAP Business Suite 7 maintenance phases, remains unchanged.

Core applications of SAP Business Suite 7
Mainstream maintenance for SAP ERP 6.0, SAP CRM 7.0, SAP SCM 7.0, SAP SRM 7.0, and enhancement packages to these releases will be extended through December 2027. Please note that the restrictions in support for Java-based applications may affect these applications to such a degree as they contain, work with or form the basis of Java-based content or applications (also see below under "SAP NetWeaver Application Server Java").

ABAP add-ons, other ABAP-based standalone releases
For ABAP-based add-on applications to the core application releases, to their enhancement packages, or to SAP NetWeaver, as well as for other ABAP-based releases, SAP will decide on a case-by-case basis whether existing releases of these applications will follow the longer mainstream maintenance to 2027 or whether SAP will ship new releases in a so-called add-on release sequence.

SAP Gateway add-ons
The add-ons of SAP Gateway 2.0 are installed on various SAP NetWeaver Releases. The add-ons of SAP Gateway will follow the longer mainstream maintenance to 2027 if the same is offered for the underlying SAP NetWeaver Release on which they are installed. This means for example that the maintenance of GW_CORE and IW_FND ends December 2025 if being installed on top of SAP NetWeaver 7.02 whereas maintenance will be offered through December 2027 if both add-ons would run on top of SAP NetWeaver 7.31.

SAP NetWeaver Application Server ABAP

- SAP NetWeaver 7.50: Mainstream maintenance will be offered through December 2027, extended maintenance until 2030.
- SAP NetWeaver 7.40 (AS ABAP only): Mainstream maintenance will be offered through December 2027, extended maintenance until 2030.
- SAP NetWeaver 7.31 (AS ABAP only): Mainstream maintenance will be offered through December 2027, extended maintenance until 2030.
- SAP NetWeaver 7.30: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.20: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.10, 7.11: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.00, 7.01, 7.02: Mainstream maintenance will be offered through December 2025. Extended maintenance will not be offered.
- SAP NetWeaver 7.03 (AS ABAP only): Mainstream maintenance will be offered through December 2027, extended maintenance until 2030.
- SAP NetWeaver 7.0 EHP3 ABAP-stack only systems will be in mainstream maintenance until December 2027, extended maintenance until 2030
- SAP NetWeaver 7.0 / SAP NetWeaver 7.0 EHP1 / SAP NetWeaver 7.0 EHP2 / ABAP-stack only systems will be in mainstream maintenance until December 2025. Extended maintenance will not be offered.

SAP NetWeaver Application Server Java

- SAP NetWeaver 7.50: Mainstream maintenance will be offered through December 2027, extended maintenance will be offered until end of 2030.
- SAP NetWeaver 7.40: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.30, 7.31: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.20: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.10, 7.11: Mainstream maintenance will be offered through December 2020. Extended maintenance will not be offered.
- SAP NetWeaver 7.00, 7.01, 7.02, 7.03: Mainstream maintenance ended by the end of December 2017.
  Please note that this restriction also affects applications based on or comprising SAP NetWeaver 7.0x Java stacks. Java applications of SAP ERP 6.0 and also its enhancement packages EHP1, EHP2 and EHP3 are not enabled to run on the SAP NetWeaver 7.30 Java stack.

Java add-ons, other Java-based standalone releases and content

- Standalone and add-on applications as well as content based on or working with the Java stack within SAP NetWeaver 7.00, 7.01, 7.02, 7.03 ran out of mainstream maintenance by the end of 2017.
- Standalone and add-on applications as well as content based on or working with the Java stack within SAP NetWeaver 7.10, 7.11, 7.20, 7.30, 7.31, 7.40 will be supported to 2020. Please note that applications may also offer a release sequence, meaning that the timeframe to 2020 may be filled by more than one release based on e.g. SAP NetWeaver 7.30 Java.
- Standalone and add-on applications as well as content based on or working with the Java stack within SAP NetWeaver 7.50 will be supported in mainstream maintenance to 2027. Please note that applications may also offer a release sequence, meaning that the timeframe to 2027 may be filled by more than one release based on SAP NetWeaver 7.50 Java.

Remark

Application Server Java 7.5 for SAP S/4HANA is supported in mainstream maintenance until end of 2030.
Please note that AS Java for SAP S/4HANA is only supported on SAP databases (SAP HANA, SAP ASE, MAXDB) as documented in the Product Availability Matrix (PAM).

Additional information

Thís note describes the maintenance strategy for the SAP Business Suite and therefore also covers components of SAP NetWeaver that are required to run the SAP Business Suite such as SAP NetWeaver Application Server ABAP (AS ABAP) and SAP NetWeaver Application Server Java (AS Java).

SAP NetWeaver standalone hub deployments such as SAP Portal, SAP Business Warehouse, SAP Process Integration etc have their own maintenance strategy. The PAM documents the availability
of SAP NetWeaver in total. Tools such as EWA reporting pick the availability dates from the PAM but cannot reflect the content of this note entirely.
The following list provides an overview of the various SAP NetWeaver versions and their mainstream maintenance:

SAP NetWeaver version in total	Mainstream Maintenance until	Extended maintenance until	Link to PAM
SAP NetWeaver 7.0 SAP NetWeaver 7.01 SAP NetWeaver 7.02 SAP NetWeaver 7.03	31.12.2017 (out of mainstream maintenance, now in customer specific maintenance)	n.a.	https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200615320900001250 https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200314690900000866 https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200615320900003225 https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200314690900002470

SAP NetWeaver 7.3 SAP NetWeaver 7.31	31.12.2020 (out of mainstream maintenance, now in customer specific maintenance)	n.a.	https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200314690900002540 https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D01200615320900005175
SAP NetWeaver 7.4	31.12.2020 (out of mainstream maintenance, now in customer specific maintenance)	n.a.	https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D67838200100900005868
SAP NetWeaver 7.5	31.12.2027	31.12.2030	https://apps.support.sap.com/sap/support/pam?hash=pvnr%3D73554900100900000414 SAP provides platform support for SAP HANA, SAP ASE and SAP MaxDB. In addition SAP works closely with third party database vendors. Backward releasing of new database versions is common practice between SAP and the platform partners. Supported database/operating system combinations will be published in the PAM successively over the maintenance period.
SAP NetWeaver AS ABAP standalone (pure ABAP development and runtime environment without any applications)			
SAP NetWeaver 7.0 AS ABAP only SAP NetWeaver 7.01 AS ABAP only SAP NetWeaver 7.02 AS ABAP only SAP NetWeaver 7.51 AS ABAP only	31.12.2025	n.a.	SAP NetWeaver AS ABAP standalone deployments fully correspond to SAP Business Suite deployments based on AS ABAP.
SAP NetWeaver 7.03 AS ABAP only SAP NetWeaver 7.31 AS ABAP only SAP NetWeaver 7.4 AS ABAP only SAP NetWeaver 7.5 AS ABAP only SAP NetWeaver 7.52 AS ABAP only	31.12.2027	31.12.2030	
SAP NetWeaver Business Warehouse			see https://launchpad.support.sap.com/#/notes/2741041 for details
SAP NetWeaver 7.0x Business Warehouse ABAP backend	31.12.2020		Business Warehouse ABAP backends only. See note 2581475. BI Java 7.0x is out of mainstream maintenance and needs to be upgraded (preferably to BI Java 7.5). Check also notes 1787619 and 1645590.

SAP NetWeaver 7.3 Business Warehouse SAP NetWeaver 7.31 Business Warehouse	31.12.2020		
SAP NetWeaver 7.4 Business Warehouse	31.12.2020		
SAP NetWeaver 7.5 Business Warehouse	31.12.2027	31.12.2030	SAP provides platform support for SAP HANA, SAP ASE and SAP MaxDB. In addition SAP works closely with third party database vendors. Backward releasing of new database versions is common practice between SAP and the platform partners. Supported database/operating system combinations will be published in the PAM successively over the maintenance period.

See also attachment "SAP NetWeaver 7.0x Business Warehouse Maintenance".

Information on maintenance phases for specific releases is also published in the Product Availability Matrix at http://support.sap.com/pam.
